**ONLINE LEGAL RESOURCE FINDER; AUTOMATED FORMS; CONNECTING LAWYERS**

Join our accomplished panelists to learn about their experiences harnessing cutting-edge technologies to solve problems of access to justice, especially among underserved populations. We will focus on three projects: designing an online legal resources finder to help *pro se* and limited resource litigants to help themselves; using advanced courthouse forms involving an automated software interview, to simplify domestic relations submissions; and, deploying information technology to enable lawyers to more efficiently find and engage in pro bono activities.
